

QUANTIFIED, INC.

Richard E. Remington, MS

(208) 426-0113

<http://www.quantified.us/>

Richard is a professional statistician with 15 years of experience as a statistical consultant. He holds statistical degrees from Northwestern University and University of Idaho (MS Statistics); and current research appointments as Affiliate Faculty at the College of Pharmacy at Idaho State University and Statistician at Boise Veterans Affairs Medical Center. Richard's experience applying statistical methods is broad, including: medical research, environmental research, agricultural experiments, statistical process control of business analytics, sampling design and extrapolation in large billing disputes. In all of this work, his primary objectives are to identify appropriate statistical methods, assess data adequacy, handle statistical aspects of missing data, provide rigorous and defensible data analysis, and assist with interpretation and reporting of results. Richard has also developed and taught both graduate school statistics and continuing education courses in applied statistical methods, and recently fulfilled a five-year term as President of the American Statistical Association, Snake River Chapter.

Select services include:

- Statistical sample design and review
- Extrapolations
